Bibliography  
of

UNEMPLOYMENT  
INSURANCE  
PROGRAM RESEARCH  
STUDIES  
1951 - 1970

U.S. DEPARTMENT OF LABOR  
J.D. Hodgson, Secretary

MANPOWER ADMINISTRATION  
UNEMPLOYMENT INSURANCE SERVICE  
Washington, D.C. 20210

## PREFACE

This Bibliography was prepared as a ready reference to serve the needs of State employment security agencies, other governmental and private research groups, and students interested in research in unemployment insurance. This publication updates the Selected Bibliography of Unemployment Insurance Program Research Studies 1951-1966, January 1967; it now includes studies published in the 20 years between 1951 and 1970. The Bibliography consists of two listings: (1) studies arranged by subject area, alphabetically by State or source of publication within each subject area, and (2) studies arranged by source of publication; the major listing is for State agencies, including the District of Columbia and Puerto Rico, from the most recent to the oldest date of issue of study for each State. Lists of related Department of Labor publications and selected publications of nongovernmental organizations follow.

The selected publications of nongovernmental facilities such as universities or private research organizations were selected from among reports that were readily available. No survey was conducted to determine the availability of other studies that were not on file with the Unemployment Insurance Service.

Primarily, the studies in the Bibliography relate to the program aspects of unemployment insurance. Studies dealing with the actuarial and financial implications of unemployment insurance are listed in a separate compilation titled A Selected Annotated Bibliography of Unemployment Insurance Financing, November 1967. Also not listed are studies dealing with administrative implications and many useful compilations and analyses of statistical data that appear regularly in bulletins and annual reports of State agencies. A few such statistical analyses, however, have been included because of their content and overlapping interest with the subject area.

"State studies" are those published by any State government instrumentality, although most reports were prepared by State employment security agencies.

Reports relating to the U.S. Training and Employment Service and State employment operations aspects of manpower research are compiled in the selected Bibliography titled Manpower and Operations Research Studies of the U.S. Employment Service and State Employment Services 1958-1967. 1968. Special research projects concerning manpower studies are listed in Manpower Research Projects. Sponsored by the U.S. Department of Labor, Manpower Administration. Through June 30, 1970. 1970. Annual report.

Requests for copies of any specific study listed should be addressed to the State agency or other organization which published it. An asterisk (\*) placed after a listed report indicates that copies are not available. Unless otherwise noted, studies were published by State employment security agencies, the addresses of which are shown on the inside back cover. The Department of Labor can supply copies of its own publications that are still in print.

This Bibliography is published in a format suitable for use in a loose-leaf binder. It is planned to update the listings periodically. Such new listings can be inserted in the loose-leaf binder at the beginning of each section. Pages in this listing are dated December 1970. As pages are revised, they will show the date of the revision.

This updated Selected Bibliography of Unemployment Insurance Program Research Studies was prepared by the Program Studies Staff, Division of Program Research, Office of Actuarial and Research Services, Unemployment Insurance Service, principally by Wilbert A. Talbert. Invaluable assistance was also provided by technicians of State employment security agencies who reviewed the listings to assure completeness.

## TABLE OF CONTENTS

	<u>Page</u>
Part I--Program Research Studies by Subject Area	
A. Extension of Coverage.....	1
1. General.....	1
2. State and Local Government Employees.....	2
3. Agricultural Workers.....	3
4. Domestic (Household) Workers.....	5
5. Workers in Small Firms.....	5
6. Workers in Nonprofit Organizations.....	6
B. Entitlement (Monetary Eligibility).....	8
1. Qualifying Requirement Provisions.....	8
2. Patterns of Employment and Earnings.....	13
a. General.....	13
b. Quarterly Wage Method Studies.....	22
C. Nonmonetary Eligibility Issues (Including Disqualification Studies).....	23
D. Reasons for Unemployment.....	27
E. Weekly Benefit Amount.....	28
1. Analysis of Adequacy of Weekly Benefit Amount.....	28
2. Benefit Adequacy Surveys.....	33
a. Local Office Interviews.....	33
b. Household Interviews.....	33
3. Dependents' Allowances.....	35
